

# EDUGENIE

## Brainstorming & Ideation

**1. Ideation Overview:** Brainstorming and ideation were carried out to identify useful features and solutions for an educational platform. The main focus was to make learning simple, interactive, accessible, and engaging for students.

### 2. Problems Identified:

- Students may find it difficult to organize learning resources.
- Traditional learning methods may not provide enough interactive practice.
- Students need quick feedback to understand their performance.
- Progress tracking can help students identify completed and pending activities.

### 3. Ideas Generated:

| Idea                     | Purpose                                                       |
|--------------------------|---------------------------------------------------------------|
| Smart Learning Resources | Provide organized study materials in one platform.            |
| Interactive Quizzes      | Allow students to practice and check their understanding.     |
| Progress Tracking        | Display completed activities, scores, and learning progress.  |
| Personal Dashboard       | Give students a simple view of their learning activities.     |
| Admin Management         | Allow administrators to manage content, users, and questions. |

### 4. Selected Concept:

The selected concept is EduGenie, a centralized educational platform combining learning resources, quizzes, results, and progress tracking in a single system. The design emphasizes ease of use and accessibility.

### 5. GetUpLink:

**GetUpLink** is the proposed access link/connection point for EduGenie. It provides users with a direct and convenient way to reach the EduGenie platform and access its educational services.

### 6. Expected Outcome:

The brainstorming process helps convert student needs and initial ideas into a practical concept and a clear set of features for the EduGenie project.
