

EDUGENIE

Project Demonstration Phase

1. Demonstration Overview: The demonstration phase presents the completed EduGenie system and explains how its major features work. It helps project reviewers understand the system flow, functionality, and expected outcomes.

2. Demonstration Objectives:

- Show the working features of the EduGenie platform.
- Explain the user flow from login to learning activities and results.
- Demonstrate quizzes, progress tracking, and administrative functions.
- Present the system's usability and overall project outcome.

3. Demonstration Flow:

Step	Demonstration Activity
1. Login	Show user registration/login and access to the dashboard.
2. Learning	Open subjects and display available learning resources.
3. Quiz	Attempt questions and demonstrate score/result generation.
4. Progress	Show completed activities and learning progress.
5. Admin	Demonstrate management of users, content, and questions.

4. GetUpLink:

GetUpLink is the proposed access link/connection point used to reach the EduGenie platform. During the demonstration, it can be used to show how users directly access the system and its educational services.

5. Demonstration Requirements:

The demonstration requires a working EduGenie application, computer or laptop, internet connection where applicable, sample user accounts, sample learning content, and test data for quizzes and results.

6. Demonstration Outcome:

The demonstration confirms the practical working of EduGenie and provides a clear presentation of its features, workflow, usability, and final project results.
