

EDUGENIE

Project Documentation Phase

1. Documentation Overview: The documentation phase records the complete information about the EduGenie project, including its requirements, design, development process, testing activities, and user guidance. It provides a clear reference for users and future developers.

2. Documentation Objectives:

- Maintain a clear record of the project requirements and objectives.
- Explain the system architecture, modules, database, and user interface.
- Document development and testing activities and their results.
- Provide easy-to-follow instructions for using and maintaining the system.

3. Main Documents:

Document	Contents
Requirement Document	Functional and non-functional requirements of EduGenie.
Design Document	System architecture, modules, database, and interface design.
Development Document	Technologies, implementation details, and development activities.
Testing Document	Test cases, expected results, actual results, and defects.
User Documentation	Basic instructions for students and administrators.

4. GetUpLink:

GetUpLink is the proposed access link/connection point for EduGenie. It is documented as the direct entry point through which users can access the EduGenie platform and its educational services.

5. Documentation Standards:

Project documents should be clear, accurate, organized, and updated whenever there are changes to the system. Version details can be maintained to track updates and improvements.

6. Documentation Outcome:

The documentation phase produces a complete project reference that supports understanding, operation, maintenance, future enhancement, and evaluation of EduGenie.
