

EDUGENIE

Requirement Analysis Phase

1. Introduction: EduGenie is an educational platform designed to help students access learning resources, practice questions, and academic guidance in a simple and user-friendly environment.

2. Objectives:

- Provide students with organized and easy-to-access learning materials.
- Support self-learning through quizzes, questions, and practice activities.
- Help students track their learning progress.
- Provide a simple interface for students and educators.

3. Functional Requirements:

Requirement	Description
User Registration/Login	Users can create an account and securely log in.
Learning Resources	Students can view and access educational content.
Quiz & Practice	Students can attempt quizzes and practice questions.
Progress Tracking	The system records and displays learning progress.
Admin Management	Admin can manage users, content, and questions.

4. Non-Functional Requirements:

The system should be user-friendly, responsive, secure, reliable, and capable of handling multiple users. Student data and login information should be protected.

5. GetUpLink:

GetUpLink is the proposed connection/link through which users can quickly access the EduGenie platform and its learning services. It provides a simple entry point for students to reach the required educational resources.

6. Expected Outcome:

The requirement analysis defines the major needs of EduGenie and provides a clear foundation for designing and developing the complete educational system.
